Exhibition Timetable

Important Information

Solemn Declaration for Electrician, Engineer, Exhibitor, Rigging Services

EXHIBITION TIMETABLE

TUESDAY 26 MAY

07:00 Site available for Open Stand Exhibitors

FRIDAY 29 MAY

07:00 Site available for Shell Stand Exhibitors

SUNDAY 31 MAY

17:00 All stands must be completed

MONDAY 1 JUNE

18:00 Opening ceremony. Contractors' passes are not valid

18:30 - 21:00 Exhibition open: Contractors' passes are not valid

TUESDAY 2 JUNE to THURSDAY 4 JUNE

10:30 - 19:00 Exhibition open: Contractors' passes are not valid

FRIDAY 5 JUNE

10:30 - 17:00 Exhibition open: Contractors' passes are not valid

17:00 - 22:00 Exhibitors can remove any items/equipment by hand only
Stand Dismantling is NOT permitted

SATURDAY 6 JUNE

07:00 Stand Dismantling starts

17:00 Shell Stands must be vacant

MONDAY 8 JUNE

17:00 Open Stands must be vacant

Build up and Dismantling hours: 07:00 – 22:00.

The Organisers stress the importance of strictly complying with the above timetable.
Bulletins will be sent to Exhibitors for further information.

Note: Dates and times may be subject to alteration.

IMPORTANT INFORMATION

THE METROPOLITAN EXPO CENTRE

- The Metropolitan Expo Centre is located in the Athens International Airport "Eleftherios Venizelos" complex in Spata, Attica.
- For your info the address of the venue is: ATHENS Metropolitan Expo AE
Athens International Airport "Eleftherios Venizelos"
Postal Address: Building 603A, P.O. Box 80072, 19019 Spata, Attica

ENTRY PASSES

- All contractors entering the Exhibition Centre during the build-up and the dismantling periods will need a contractor's pass. During the Exhibition opening days the contractor's pass is not valid.
- Exhibitors must register their contractors' company name. Contractors, once confirmed, are responsible for issuing passes for their staff.

STAND REGULATIONS

- Plans of all stands must receive the written approval of the Organisers. This is important to avoid on-site problems concerning conformity with stand regulations. Drawings to scale MUST show the dimensions of the ground plan, the elevations, 3d visuals and the main fittings. The Organisers reserve the right to require alteration or removal -at the exhibitors' cost- of any stand which differs from the approved specification or which does not conform to exhibition regulations. Stand designs have to be submitted by email: dlymperopoulos@posidonia-events.com. Deadline for submission: 31 March 2026.
- Deviations may occur from the stand drawings we provide to exhibitors. To ensure precise information, exhibitors are required to find out on the spot, details about columns, water & power supply points, fire equipment boxes, etc.

Open Stands (30m² minimum)

- Each stand must be structurally self-supporting with no fixings to any part of the existing building or adjoining stand. The stand number must be displayed prominently on each stand.
- On open stand designs, the perimeter wall must have a height of 3m. In the case of stands that use a raised floor (max. 10cm), the part of the stand walls that is visible above adjoining stands must be finished flush and painted off-white to hide all wiring and unfinished construction.
- At least 60% of each stand side facing onto a visitor aisle must remain open or fitted with transparent material. Adjacent or opposite stands must not be hindered and there must be no impairment of the view into those stands.
- The height limitation for open stands with one floor is 4m (excluding boundary walls which must be 3m). Interior display height permitted up to 4m if clear of stand boundary by no less than 1m and with approval of the Organisers. The height of exhibits can rise up to 4m maximum (apart from machinery exhibits which can rise up to 5.5m) if clear of stand boundary by no less than 1m.
- Permitted loads (exhibits and heavy vehicles transporting materials): point load up to 10,000 kg on a surface area of 30x30 cm and simultaneous load up to 1,000 kg/m² in all exhibition halls.
- Open stand exhibitors are responsible for the construction of their own boundary partition/walls. Where stand walls are visible above adjoining stands, or where the ceiling is visible, the work must be finished flush and painted off-white to hide all wiring and unfinished construction. The same applies also to the back of the boundary walls facing service corridors. Failure to cover the back side of walls facing the service corridor or side walls visible from neighbouring stands will result in a penalty charge of €1,000 + VAT. Covering the backside of a stand with cloth or other similar material is not allowed.
- For stands up to 3m, exhibitors must provide a certificate confirming the structural integrity, stability and fire safety of the proposed stand. Exhibitor Solemn Declaration sample form is attached.
- For stands over 3m, stand designs must be accompanied by a certificate confirming the structural integrity, stability and fire safety of the proposed stand by a qualified civil engineer or architect. Engineer Solemn Declaration sample form is attached.

- Maximum stand space with ceiling allowed: 30m². Fire protection measures according to P.D. 41/2018 & P.D. 71/1988 must be applied. For more information, please click [here](#).
- All stands must be accessible to people with disabilities without any further assistance. For stands with an elevated floor of 4cm and over, it is obligatory to construct ramps following below specifications:

Height difference (m)	Max Inclination	Tolerable Length (m)
0.04-0.1	10%	1

For two-level stands

- The minimum stand size required for a second level is 50m².
- Maximum allowed second level area: 30m².
- For stands over 3m high, stand designs must be accompanied by a certificate confirming the structural integrity, stability and fire safety of the proposed stand by a qualified civil engineer or architect. An additional certification from a civil engineer confirming the second level's structural integrity is also requested.
- The maximum height for a two-level stand is 5m including any associated display and reaching this height is strictly allowed only for the 2nd level construction. Boundary walls which are not part of the second level must be 3m high and must follow the same rules as in one-level stands. Draft proposals should be submitted to the Organisers in advance for comment.
- A non-flammable ceiling should be no less than 2.30m from the hall floor and the stand should be equipped with additional fire extinguishers.
- Fire protection measures according to P.D. 41/2018 & P.D. 71/1988 must be applied. For more information, please click [here](#).
- Ceiling on the second level is prohibited.
- Maximum enclosed space around the perimeter of the second level up to 50% of the total surface area of the floor.
- In the case of rooms, tents, containers and spaces closed on all sides and with ceiling, an autonomous sprinkler system or an equivalent system (eg bonpet) and smoke or differential heat detectors must be installed, even if the ceiling area is less than 30 m².
- Areas with an increased risk of fire within the exhibition stands (e.g. kitchen, storage room, cloakroom, utility room, etc.) must always have open ceilings.
- The self-supporting boundary walls of a two-level stand adjoining any neighbouring stands must prevent visibility to the neighbouring stands and be finished flush and painted off-white for its full height and width against those adjoining stands. Covering the backside of the 2nd level with cloth or other similar material is not allowed.
- Any upper-level balustrade and handrail should be no lower than 1.10m. Stair is normally 0.90m between handrails with 2m head clearance, and risers 0.19m (7.5") with treads at 0.26m (10").

Shell Stands (12-29 m²)

- Stands from 12 to 29 m² will have a mandatory shell scheme package.
- Shell divisions are restricted to a standard 3m height and ceiling bracing and fascias within this height must remain in position.
- Fascias are of a uniform design and may not be removed or altered by exhibitors.
- Shell stands are provided with their own stand number.
- Any kind of puncturing (nails, staplers, pins etc), as well as painting of the panels and of the aluminum framings is strictly not permitted. Where adhesive tape or self-adhesive vinyl printings are used, the exhibitor must ensure to carefully remove these and restore any possible damage. For suspending items on the panels of the standard shell scheme stands, the exhibitor can order hooks from Expowork.
- Shell scheme stands will be delivered clean on Monday 1 June in the morning. (Shell scheme stands will be cleaned Sunday 31 May at night).

HANGING BANNERS

- There will be a charge by the Organisers for the promotional space used by banners.
- For rigging services and optional banner production, please contact Expowork SA at posidonia@expowork.gr by 30 April 2026. Expowork SA has exclusivity for rigging services.
- Banners must not extend beyond the boundaries of the stand allocated and must be at least 1m away from boundaries with adjoining stands and clear of stand construction and exhibits by no less than 1m. Also, banners and trusses must have at least 1m distance from the columns of the Exhibition Center.
- Banners may be single or double sided. If 3-dimensional or irregular in shape, they will be treated as a structure. In this case, please contact the Organisers for a quotation. No banners are allowed to be hung without the Organiser's prior approval.
- The location depends on proximity to the fixed ceiling beams of the exhibition hall which are affixed to the hall ceiling.
- Rigging services are not available after the stand construction period has commenced (26-5-26).
- The Solemn Declaration sample form for rigging services is on pg. 13.
- Exhibitors must include banner details on their stand design proposal (dimensions, distance from neighboring stand and height from bottom of banner to ground) as they need approval from the Organisers before proceeding with the banner. If banners are not shown on stand designs, exhibitors may not get approval for rigging inside the venue.

Different specifications apply to Halls 1,2,3 and Hall 4

Size & Locations for Halls 1,2,3

- Inside exhibition hall only, permitted only over stand/pavilion space (30m² minimum). Please contact the Organisers for a quotation.
- Height from Ground: Given that the bottom of the banner must be at least 4m from the ground and clear of stand construction and exhibits by no less than 1m, please contact Expowork for technical implementation of rigging needs. The maximum height of the banner from the ground can be 5.50m, so the maximum height of the banner itself cannot be more than 1,5m, subject to all above requirements are met.

Size & Locations for Hall 4

- Inside exhibition hall only, permitted only over stand/pavilion space (30m² minimum). Please contact the Organisers for a quotation.
- Height from Ground: Given that the bottom of the banner must be at least 4m from the ground and clear of stand construction and exhibits by no less than 1m, please contact Expowork for technical implementation of rigging needs. The maximum height of the banner from the ground can be 7m, so the maximum height of the banner itself cannot be more than 3m, subject to all above requirements are met.

Note: It is prohibited to support elements, parts of structures or exhibits from the ceiling.

GENERAL

- **Contractors are kindly requested to notify the Organiser's office upon their arrival.**
- During build up and dismantling periods, exhibitors and any personnel carrying out construction work on behalf of an exhibitor are required to wear Personal Protective Equipment (PPE), hence safety helmets, gloves, high-visibility vests, safety footwear.
- No fixings are permitted to any part of the existing structure; it is not permitted to hang any object from the ceilings and structural elements of the halls or the service networks that run below the ceilings, unless in cooperation with Expowork. Exhibitors must ensure that arrangements are made in their stand design for all parts of their work to be self supporting.

- Exhibitors with stands divided into two blocks by the corridor running through them, are permitted to join both sections of their stands with a discreet arch (with a maximum height of 4m and a maximum depth of 0.5m), which leaves a minimum clearance height of at least 3m.
- Exhibitors with stands less than 3m height are responsible to finish and paint off-white the rear side of neighbouring stands.
- Carpet or carpet tiles may only be fixed to the floor with double sided adhesive tape applied on masking tape. No other form of floor fixing is permitted.
- **Ceiling** may impair the effect of the venue's roof sprinkler system. In this case, exhibitors are requested to install a sprinkler system on the stand itself. Maximum stand space with ceiling allowed: 30m². Fire protection measures according to P.D. 41/2018 & P.D. 71/1988 must be applied. For more information, please click [here](#).
- In the case of rooms, tents, containers and spaces closed on all sides and with ceiling, an autonomous sprinkler system or an equivalent system (eg bonpet) or smoke or differential heat detectors must be installed, even if the ceiling area is less than 30 m².
- Closed spaces without ceiling (meeting rooms, storage rooms, etc.) inside stands are allowed up to 30 m² in size and within them a portable fire extinguisher must be placed.
- The areas with an increased risk of fire within the exhibition stands (e.g. kitchen, storage room, cloakroom, utility room, etc.) must always have open ceilings.
- According to the Exhibition Centre's technical regulations, the use of LED luminaires and lamps is compulsory in the exhibition stands for environmental reasons. This will also reduce the total electricity cost paid by the Exhibitor.
- All stands must be accessible to people with disabilities without any further assistance. For stands with an elevated floor of 4cm and over, it is obligatory to construct ramps following below specifications:

Height difference (m)	Max Inclination	Tolerable Length (m)
0.04-0.1	10%	1

- The erection and removal of stands and material must take place within the time limits specified by the Organisers at the cost, care and risk of the exhibitor.
- Construction work on stands will not be permitted after 17:00 on Sunday 31 May.
- Exhibitors can remove by hand only, any items/equipment on Friday 5 June between 17:00-22:00, after the closure of the exhibition.
- Exhibitors must ensure to have a representative from their company on the stand from the closing on Friday 5 June between 17:00 and 22:00 to supervise the transfer of their items and also on the following day from 07:00 during stand dismantling.
- Exhibitors are permitted to dismantle their stand on Saturday 6 June, Sunday 7 June and Monday 8 June from 07:00 onwards. Shell Stands must be emptied by Saturday 6 June at 17.00. Open stands must be vacant by Monday 8 June at 17.00.
- Dismantling a stand before the period set for dismantling is a breach of contract. The Organisers are entitled to impose a penalty charge of €1.000 plus VAT (where applicable).
- Any property or stand material remaining on the exhibition premises after the dismantling period will be disposed of by the Organisers at the exhibitor's expense. The Organisers are entitled to charge a penalty and a storage fee for any items not dismantled and removed in due time. The Organisers are also entitled to have such items removed and taken into storage by a suitable company immediately at the expense and risk of the Exhibitor, or to have them disposed of.
- All exhibition stands must be manned by an authorised representative of the exhibitor throughout the opening hours.
- All stand designs, materials and workmanship must comply with European Health and Safety standards.
- The co-ordinator of a national pavilion must notify the Organisers of the exhibiting companies within the pavilion, including a detailed stand sketch, displaying each company's location in the pavilion.
- Exhibitors should note that compressed air is not provided.
- Exhibitors must not permit anything which causes a nuisance or, in the opinion of the Organisers, does not conform with the general standards of the exhibition.

- Social on-stand events (presentations, receptions, parties etc.) are subject to the following:
 - 1) All on-stand events must obtain written approval by the organisers.
 - 2) Exhibitors are not allowed to organise events which might affect the participation of neighbouring/ adjoining exhibitors in any negative way.
 - 3) Music and/or other sounds (i.e. presentations) must not exceed 70 decibels. The organisers reserve the right to stop an event if permitted noise levels are exceeded. Live bands or DJ sets are allowed only on Thursday 4/6 after 18.00. All other events are allowed to play only light background music.
 - 4) All on-stand events must be held strictly within the stand boundaries and are not permitted onto the Exhibition corridors.
 - 5) If an exhibitor wishes to organise an event past the closing time of the exhibition, this must be applied for in writing. The resulting costs for supervision, security staff, parking services, medical support, etc. will be charged to the exhibitor and are payable in advance. Events past exhibition hours must end at 21.00.
 - 6) Should the exhibitor not conform to the regulations stated, the organisers reserve the right to impose a penalty charge.
 - 7) If the Exhibitor plans to have music on-stand, he undertakes exclusive responsibility for receiving the required written permit, in advance, from the Collecting Society for Music Copyright AUTODIA (Autodiaxeirisi). This permit should be available onsite at all times, as it may be requested by AUTODIA representatives. Any music reproduction not registered may lead to claims for damages from AUTODIA.

Contact information for AUTODIA:

Ms Dimitra Mitsopoulou
Tel: +30 210 3215278 Ext. 324
Mob: +30 693 7286633
Email: dmitsopoulou@autodia.gr

- Working exhibits are allowed only for demonstration purposes and for small intervals throughout the duration of the exhibition, with prior written approval from the Organisers. Working exhibits must conform to statutory regulations and make due provision for public safety.
- The use of compressors for the painting of stand materials and the use of equipment for the cutting of wood or any other construction work inside the exhibition venue that may cause bodily harm or any damage to the venue is strictly forbidden. It is clarified that stand construction works (painting, decoration etc.) must have been completed one day before exhibition opening.
- The use of plaster boards as exhibition booth building material is not permitted. Venue management will stop stand construction and evict contractor if plaster boards are used.
- It is not permitted to use any means that destroy or alter floors, walls, ceilings, windows, etc. to make holes, hammer, hang or use walls, ceilings, windows, columns, floors and any other structural elements and generally make any interventions on the form, strength and aesthetics of the Metropolitan building spaces.
- The use of WCs or other areas for the washing of paint brushes and other objects is not permitted. Specially designated areas must be used for these activities.
- All exhibits must be confined to the area rented by the exhibitor. Any exhibits, stand material or empty boxes found outside this area (including back and sides) at any time before or during the period of the exhibition will be removed at the expense and risk of the exhibitor.
- The arrangement and payment for conveying goods to and from the exhibition, and for receiving, erecting and removing these goods is the exhibitor's responsibility.
- Stand cleaning must be specially ordered and will be carried out at the expense of the exhibitor. The Organisers are responsible for the maintenance and cleaning of the indoor and outdoor aisles used by the public.
- Smoking is not permitted inside the Metropolitan Expo.
- The exhibitor affirms that, to the best of his knowledge, he has the legal authority for the use of any intellectual property associated with any product or promotional material that he will display, offer, or otherwise use in his participation at the trade show/event and he will not knowingly infringe the intellectual property rights of another party.

■ Video recordings and photographs will be taken at Posidonia 2026. By exhibiting at Posidonia 2026, the exhibitor and his/her representatives agree to have their photos and likeness used by Posidonia Exhibitions SA. If you do not agree, please contact the Organisers.

VERY IMPORTANT: FIRE PRECAUTIONS

Fire fighting equipment may not be moved or hidden within stands by exhibitors/contractors and must be accessible, visible and its door must be able to open at least 180 degrees. **Only flameproof and fireproof materials may be used.** Extra fire precautions may be required in some cases by the local authorities.

HOUSE CONTRACTOR - SHELL STAND CONSTRUCTOR

Expowork SA has been appointed as the exhibition's official House Contractor. The company will provide shell scheme packages (basic, business, executive, wooden), furniture, carpeting, cleaning, water and waste services, telephones, AV/Computers, internet, rigging services, etc. If you are interested in ordering any of the above, please contact Expowork SA by email: posidonia@expowork.gr or visit their website: www.expowork.gr. Note: Provision of services subject to availability and venue restrictions.

FORWARDING, SITE HANDLING AND CUSTOMS CLEARING AGENT

- MTS ExpoLogistics Ltd is the official onsite Freight Forwarder/Custom Broker of Posidonia 2026. For safety and liability reasons, MTS ExpoLogistics Ltd has the **exclusive** responsibility for the movement of all goods, exhibits and stand material in and out of the exhibition building (except for exhibit material that can be carried by hand). They are responsible for the delivery of the shipment from outside of the exhibition centre to the stand, removing empty cases for storage and returning them at the end of the exhibition and the movement of the shipment from the stand to the exterior of the exhibition centre. The use of fork-lifts, pallet trucks, hand pallet trolleys and cranes is only permitted to the official forwarder of Posidonia 2026 (please contact MTS ExpoLogistics for price lists concerning the necessary equipment).
- Exhibitors are urged to pay very careful attention to all circulars sent out by MTS ExpoLogistics as difficulties and delays may arise if their instructions are not complied with. They must ensure that the circulars provided by MTS ExpoLogistics are brought to the attention of their contractor. In case of late arrival of any exhibits and/or bulky items, the organisers reserve the right to refuse their entry into the exhibition area.
- MTS ExpoLogistics is the official Forwarder but exhibitors may ship their freight by carrier of their choice to the exterior of exhibition venue only. Anyone wishing to use their own forwarding agents for pre-carriage should note that all shipping documents (airway bill, bill of lading, invoice, packing list, etc) must be consigned to MTS ExpoLogistics Ltd.

If you are interested in arranging the transportation and delivery of your exhibits to your stand, please contact Mr. Manos Tsantes by email: posidonia@mtsexpolog.com or visit MTS ExpoLogistics website: www.mtsexpolog.com.

SECURITY

Exhibitors are reminded that although the Organisers provide 24h perimeter security service during installation, dismantling and the exhibition week, each exhibitor is ultimately responsible for the security of his exhibits, materials and personal items. While Organisers will take reasonable care to safeguard each exhibitor's property, neither management, the contractors, nor any of their officers, agents, or employees assume any responsibility for the exhibitor's property. To maximise security in the exhibition, visitors will be required to exit the exhibition centre at the official closing time each day. Exhibitors will be admitted in the exhibition centre one hour before the official opening time and can remain a half hour after the exhibition closes. Exhibitors who require additional time in their stands, must notify the Organisers in writing.

ELECTRICAL CONTRACTOR

Expowork SA is the official Electrical Contractor. In accordance with the Rules and Regulations (par. 9k), electricity will be supplied from the building only through the official electrical contractor, who acts as the agent of the Organisers. Electric current will be supplied thus: Three phase 5 wire AC380V/50Hz.

The electrical installation for open stands carried out by third entity must be conducted by a certified electrician pursuant to the applicable legislation and the regulations on interior electrical installation. In this case the exhibitor, during the buildup period, must submit a design of the said installation to the Electrical Contractor for approval, accompanied by a photocopy of the appointed electrician's license, as well as a Solemn Declaration signed by him, by which he shall guarantee the safe construction and operation of the said installation. The Solemn Declaration of Electrician form is on pg. 10.

The electrical boards of the stands must be placed on visible locations, with easy access for safety reasons.

To order electricity, lighting and relevant services please contact Expowork SA by email: posidonia@expowork.gr or visit their website: www.expowork.gr.

ELECTRICIAN'S SWORN DECLARATION

Surname: _____

Name: _____

Electrical Installation Licence No.: _____

Address: _____

Tel: _____ Email: _____

Under my personal responsibility and in awareness of the penalties of the law, I hereby declare that:

1. All the information included herein is true.
2. I am the holder of the aforementioned license, the validity of which has not been suspended on any grounds.
3. This license covers the following electrical installations performed by me at the METROPOLITAN EXPO exhibition center, which I have executed and checked in accordance with existing regulations pertaining to interior electrical installations and the applicable legislation, particularly as regards their safe operation and proper selection and installation of suitable materials, electrical fuses and switches in electrical panels and their circuits.
4. The installations in their entirety may be supplied with electricity and I hereby guarantee their safe and uninterrupted operation, and furthermore I assume full responsibility for any repercussions arising from this installation.
5. I, the undersigned, hereby provide explicit and unreserved consent, pursuant to the General Data Protection regulation (EU 2016/679 - GDPR), to the storage of my personal data, as entered in this form by myself and submitted to serve the purposes of the technical company Expowork.

4. I faithfully observe the provisions of the legislation in force and I take all the necessary health and safety measures for my staff, in order to avoid accidents happening to them or to third parties, as well as to prevent damages.
5. I guarantee the technical integrity, safety and static adequacy of the construction of my stand, and I declare that I bear full liability, criminal or civil, for bodily injury that might occur to any third parties, or any labor or other accidents which might be caused, and generally for any damages or failure that can be caused by the above construction.
6. I confirm that the equipment used is suitable and certified according to European standards.
