

Maritime is electrifying.

Navigating towards a decarbonized and digitalized future

We very much look forward to welcoming you at the Seminar in Posidonia 2024, which is taking place on **June 6, at 17:00-18:30 in the Posidonia Seminar Room 2B in Hall 2.**

Join us as we explore Greek maritime industry's journey towards sustainability through decarbonization and digitalization. This presentation delivers the advancements in electric propulsion and cutting-edge technologies transforming the sector. Discover how Greece is pioneering the shift to cleaner, smarter maritime operations, setting a course for a more sustainable and efficient future.

	Speaker	Topic
	Antonis Asimakopoulos	Introducing ABB Marine at Greece
 	Michael D. Christensen Tom Sand	Towards an energy efficient future for shipping Cargo vessel solution
	Tuomo Salmi	A leap in efficiency High efficiency propulsors and thrusters
	Antonis Asimakopoulos	Closing remarks
